

THE STONE CHIPPER

THE 633RD MEETING OF THE AUSTIN GEM AND MINERAL SOCIETY WILL BE HELD ON THURSDAY, **FEBRUARY 26TH, 2009, 7:30 P.M.**, AT THE AGMS CLUBHOUSE, 6719 BURNET LANE, AUSTIN, TX. PHONE: (512) 458-9546.

The February program will be a presentation by **Rosemary Wyman** of Baer Engineering and Environmental Consulting. Her topic will be **“Fire on the Water: Impacts of Firefighting Activities for the Helotes Mulch Fire on the Edwards Aquifer.”**

AGMS Annual Show
 Gem Capers 2009
 Palmer Events Center
 October 23rd - 25th.
www.GemCapers.com

THE AUSTIN GEM AND MINERAL SOCIETY, INC.

The AGMS is a member in good standing of the South Central Federation of Mineral Societies and the American Federation of Mineral Societies. Its editors are also members of SCRIBE. The club address is 6719 Burnet Lane, Austin, Texas 78757, and phone (512)458-9546. **The AGMS is a 501(c)(3) nonprofit organization.** Visit our website at www.AustinGemAndMineral.org. Contact our webmaster for website updates at DiannH@austingemandmineral.org.

PURPOSE

The purpose of the AGMS is to promote interest and education in the various Earth Sciences and other related subjects.

MEETINGS

The Society meets the fourth Thursday of every month except October which is show set up day. There will be a meeting on the **THIRD** Thursday in November. December is the Invocation of Officers meeting held on a date and at a place determined by the officers. Board meetings are called as needed. All members are welcome to attend. Society Officers are listed on the back page of this publication. Please feel free to contact any of them for information.

DUES FOR 2009

Membership dues are:

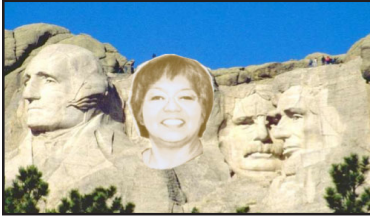

\$15.00 annually for an adult \$20.00 annually for a couple \$4.00 annually for juniors

THE STONE CHIPPER

The Stone Chipper is the official publication of the Austin Gem and Mineral Society. It is published monthly in Austin, Texas. Minutes of Board Meetings are available upon request. President's Message - Josie Middleton, President

Hi Fellow Rockers, don't you just love the sway of a rocking chair? That's pretty much all you can do once you get back from Tucson and recover. This past month's lecture that was given by Alan Cherepon was just fun, didn't you think! It reminded me of the days when I went out to Tucson and I really miss that. I miss seeing all my friends and ex-AGMS members that have moved to other parts of the U.S. The parties that are held can be fantastic if you are lucky enough to be invited or know someone that is going. All of this is just good times as far as I am concerned. If you can ever go, you may find that simply seeing what others collect, find, or even just what's for sale, can be fun. Also intriguing are the rarities that you cannot get unless you are fortunate enough to visit other countries.

We are trying to set up the classes and hope that you can join one. Make sure you sign the interest class notebook so that Joyce Hrapsky can connect you. You don't want to miss that class you have an interest in! I can see that items are being finished off and things are going at a steady pace, which is all well and good. Also one more thing, try to send those show pin drawings if you have a great idea. We try to have a new pin for our show every year. See you at the next meeting!

January 22, 2009 Meeting Minutes - Linda Northcote, Secretary

Program: Former club President Alan Cherepon gave a talk on the Tucson Show, 2008.

Call to Order: The meeting was called to order at 8:15 p.m. by Josie Middleton, President.

Minutes: Diann Hill moved that the minutes of the November meeting be approved. Stretch Young seconded the motion, and it passed.

Procedures: Diann Hill is working to update the AGMS club policy and procedures. Diann went over some procedures that the current documents include, which members may not be aware of. In order to request action by the Board of Directors, you must personally appear at the Board meeting. Door prizes can be pre-selected and limited in number. If you assume someone's office, you fulfill their term and it doesn't count as YOUR term. There is no selling of items allowed during the meetings from approximately 7:15 p.m. through 9:00 p.m. Refreshments are to be served after the meeting. Committee chairs must make a report in person to the Board at least once per quarter. The sites *GemCapers.org* and *GemCapers.com* have been purchased. A policy on classes has been written by Robert Morriss and approved by the Board.

Membership: Diann Hill reported 72 members present with five visitors and one junior.

Donations: Grant Gibson donated a book to the library.

Treasurer: Pauline Denson reported a budget surplus.

Show Committee: Brian Wetzig said that the theme for Gem Capers 2009 will be "The History of Mining." They need articles on this topic for the *Show Bulletin* and *The Stone Chipper*. Also needed is a drawing for the show pin. The show dates are October 23rd-25th. We will go back to the smaller hall this year. Our club mascot has been named "Rocky." The grand prize will be an amethyst cathedral. Show committee meetings will be held on the third Thursday of the month at 7 p.m.

Building: Bob Greenway had no report.

Classes: Joyce Hrapsky said that the newly created policy for classes is being implemented. Copies of the policy are available for viewing. She needs teachers to volunteer for classes. Please sign up in the book if you want to take a class.

Field Trips: Chip Burnette and Ron Carman announced a field trip in May on the Memorial Day weekend to Alpine. It is being sponsored by Teri Smith of the Antelope Lounge. We will be going to the Ritchie Ranch and two other new locations.

James Mercier reported on the Thanksgiving field trip to Ritchie Ranch and Big Bend. He also donated a book to the library.

Historian: Ed Gage needs photos to complete the club history book. He can accept them through the end of February.

Library: Harriet Strieber reported that the library still needs one more volunteer to help. The library continues to grow. She reminded members that they can only check out two items at a time for one month. They can be returned via the mail slot near the front door.

Email List: To get onto the email list and to receive your newsletter via email, send a note to the editors at stonechipper@austingemandmineral.org.

Sunshine: Ron and Jennifer Guzman have taken over the duties of the Sunshine Chair. Please send them news of member illnesses and good news as well.

Workshop: Gef Fisher reported that the workshop will be open on Wednesdays starting February 11th from 7-9 p.m.

Old Business: It was determined by the Board that the AGMS cannot house the Paleo club's library on site.

Miscellaneous: Gef Fisher would like to put together a field trip locale notebook for current and future field trip chairs to utilize. Jackie Fisher is doing an inventory of the Texas mineral case in the library.

Announcements: There is a show in Tyler this week-end. The Georgetown Show is February 21st-22nd, as is the Clear Lake show. The Corpus Christi show is March 7th-8th, Big Spring and San Antonio will be on March 21st-22nd.

Adjournment: Show and Tell was held, followed by meeting adjournment at 9:03 p.m.

February Program Preview - Provided by Kathleen Howard, 2nd VP

Rosemary Wyman of Baer Engineering and Environmental Consulting will present "Fire on the Water: Impacts of Firefighting Activities for the Helotes Mulch Fire on the Edwards Aquifer" which focused on the December 25th, 2006, debris pile fire located at a construction company in Helotes, Texas. The debris pile covered approximately 4.1 acres, was approximately 80 feet tall, and contained approximately 171,000 cubic yards of material. At one time up to 400 residents were evacuated from their homes due to the impact from the smoke. The debris pile was located over the Edwards Aquifer Recharge Zone. When firefighting began it was determined that there was a direct connection between the debris pile and the Edwards Aquifer. The firefighting methodology was altered to minimize impact on the aquifer. A balance was reached between aquifer protection and the human health and safety issues created by the smoke.

Joan Crane will be giving a demonstration on cleaning fossils using her ‘mystic cleaning gun,’ (and, hopefully, Frank will be able to bring a few of these and other cleaning tools to sell to any member who desires one) at our next meeting on February 17th at 7 p.m. She will be assisted by Linda McCall and Ed Elliott who will demonstrate their techniques with different tools. Both Frank and Joan Crane currently volunteer at UTA to help clean fossils.

Paleo Club News

NOTE: Please send notices of changes of address or to report errors on the mailing list to: **Pauline Denson**, treasurer. To be signed onto the AGMS email list and/or to receive the newsletter via email, please send a note to the editors at StoneChipper@austingemandmineral.org.

It’s that time of the year again! Annual adult, \$20 for a couple, or \$4 for a junior. You can pay at this month’s meeting or mail a check to the club address, care of the treasurer.

dues are due for club membership. The cost is \$15 for one person. You can pay at this month’s meeting or mail a check to

Dues are Due

Sunshine Committee

Susan Postlethwait’s Dad has been battling a long time illness and in and out of the hospital. We all are thinking about her and her family and hope that he is better soon.

Please send any news to Ron and Jennifer Guzman.

- Feb 11,14,25 - Workshop Open 7:00 - 9:00 p.m.
- Feb 17 - Paleo Club Meeting - 7:00 p.m.
- Feb 19 - Show Committee Meeting 7:00 p.m.
- Feb 21-22 - Williamson County Gem Show
- Feb 26 - AGMS Club Meeting, 7:30 p.m.
- Mar 03 - Board Meeting 7:00 p.m.

Polishing Rhodochrosite
from Ed Wengerd’s Notebook

SHOP TIPS

When cutting rhodochrosite, it is important that only water be used in the saw. An oil-based product will be absorbed and the stone’s color will be deadened. After you’ve shaped the stone to its desired form, first sand on a 220 wheel and then move through the various mesh wheels. Use plenty of water and don’t apply too much pressure. Check the stone carefully with a loupe or magnifying glass between wheels to be sure you’ve removed all the sanding marks and flat spots. The best polishing agent for rhodochrosite is still to use a felt wheel with tin oxide mixed with a small amount of vinegar.

~From Gem Cutters’ News, 01/06, via Shin-Skinner News 10/07

Cab Cutting Tip: Need two cabs of exactly the same size? Glue two slabs together with paper between them. Cut to size. Separate by soaking in water.

~From Rockhound Rambling 12/04, via Sooner Rockologist 04/05, Shin-Skinner News 10/07

Board Minutes Synopsis - January 6, 2009

By Linda Northcote, Secretary

NOTE: These are synopsis minutes. For full text of board minutes, please contact the club secretary.
~Editors

Repairs update:

- Partial repair on the door frame. Consider replacing the whole door and frame with an aluminum one. More work to be done around the frame with Hardi Plank. Linda offered the HardiPlank scraps left over from her exterior remodeling. Robert will come pick them up. Leftovers can be used as table surfacing.
- Andrea says that she can get vinyl duct tape, which is cheaper and faster to use than the kits.
- The floor will be done once the door is completed.
- Alan can fix the toilet.
- The roof is not showing signs of new leakage, but there has been no rain to speak of. We will continue to monitor it.
- Cleanup of the interior painting will be done as part of a clubhouse clean up.
- The outside light over the parking area needs rewiring by a licensed electrician. Gef has an apprentice ticket now and can assist, since the job requires 2 people. It will cost between \$200 – 250.
- The wood under the A/C unit still needs painting. Gef will check if the lumber used was treated, and if not, will paint it.
- Sections of base board are missing from the termite damage and need to be replaced. Measurements were taken and one 8-ft. section of molding is required.
- The saw shed and back shed need scraping and painting, but Andrea says the saw shed is done.

Joyce needs information on the educational supplies that are available. Jackie will supply a list.

Paleo club requested space for their library at AGMS building. Request denied due to lack of space, liability issues, and lack of control.

James Lopez submitted a proposal for teaching a lapidary class. Tabled until he can come and present the proposal in person. Instructors must accept tenets of written class policy in order to conduct classes. Policy to be distributed to all instructors and Board members. Try to print in newsletter.

A parent must be present when a minor is taking a class. Insurance covers all members. Standard Operating Procedures will be rewritten to accommodate this stipulation and other corrections. The people on the committee will include Ron Carman, Robert Morriss, Dee Fly, and Diann Hill.

Items discussed but no action: revamping the decal, making a bulletin board, designing a patch, a new T shirt, and other things to promote interest.

Junior Chair unfilled. Discussed how junior group could be run. Will survey juniors to ask what they want.

It was moved to make the January field trip to Big Bend – Alpine area an official AGMS trip. An email will be sent to Ed Tindell, who is running this trip.

Board decided to keep meeting on the first Tuesday of the month.

Rocks – Rocks – Rocks

By Lily Cave, Age 8
AGMS Club Member

Rocks, rocks, rocks,
Think about rocks,
Dig for rocks,
Dig in west Texas for agates.
Polish rocks,
Tumble, polish, and shine agates.
Show rocks,
Take favorites to club and show agate.
Do anything you can with rocks.
Rocks, Rocks, Rocks,
I love rocks.

Exhibiting For 38 Years

By Paul Good, Federation/Conservation

In February, Margaret and I will have completed 38 years of taking exhibits to schools, universities, public libraries, and museums. Since moving to Kyle, we have only taken our exhibits to schools and public libraries. Since June 2001, we have had one or two exhibits at the Kyle Public Library on a continual basis.

At the beginning of each school year, we take a display case to the schools. We change the exhibit about every six weeks so the students do not see the same exhibit in a three year period.

This year we took exhibits to eleven schools in Hays Co, traveling 753 miles. These schools have a total enrollment of 8,548 students. Last year, we had six exhibits in nine schools, one school had three, and another only had one.

We get a lot of enjoyment by taking the exhibits to the schools. The students and teachers call us the "Rock People." On some occasions, we meet a family in Wal-Mart and the students will say to their parents, "That's the Rock People."

39TH ANNUAL

WILLIAMSON COUNTY GEMBOREE

FEBRUARY 21ST AND 22ND, 2009

COMMUNITY CENTER, SAN GABRIEL PARK,
GEORGETOWN, TEXAS

Sat Feb 21st, 10-6 pm, Sun Feb 22nd, 10-5 pm
Adults \$2.00, 6-12 \$1.00, under 6 free

Sunday morning, February 22nd, the ROLLIN' ROCK CLUB will meet at 9:00 a.m., (coffee and donuts provided). Exhibits, demonstrations, games, educational displays, fluorescent minerals, custom and design jewelry. Hourly door prizes. Grand Prize drawing. Food and Refreshments available. Bill Medford, Show Chairperson, 612-930-2768. Proceeds support college Earth Science Scholarships.

AGMS Field Trip Bordovsky Ranch December 7, 2008

On Saturday, December 7th, 2008, about Karnes City to hunt the Bordovsky Ranch sought after “shrink wood” and palm mens and lapidary materials. The day but soon warmed up to an absolutely shirt-sleeve weather abounded with temperatures in the upper 60’s to lower 70’s, a beautiful sky, and no wind.

Bordovsky Ranch, Photo by Paul Bordovsky

By Tom Bowers
AGMS Club Member

15 members met Paul Bordovsky in for petrified wood, including the much wood, agate, and other collectable specimens started off quite brisk, 24° at daybreak, perfect day for hunting. By 10:30 a.m.,

Paul got our juices flowing before we ever left Karnes city by showing us his truck bed covered with beautiful examples of palm wood and “shrink wood” along with other well silicified wood with good color that he’d picked up from his father’s ranch. Paul explained that the ranch was over 680 acres in size and that we’d start out hunting an 80 acre field that his father had recently plowed. The field had some areas that seemed to have more rocks on the surface than dirt. Since they’d been recently turned over, new material had been exposed and the selection promised to be very good – as demonstrated by the samples in Paul’s truck!

Someone asked what the age of the Ranch exposure was, and Paul said that it wasn’t definitely determined. Robert Morriss reminded the group that Paul’s father had owned the ranch for 30 years so the wood was at least that old. [In the *Backbender’s Gazette*, May 2003, Scott Singleton identifies the formation as “a hillock composed of the upper Miocene Oakville Formation (approximately 15–25 mybp)” but notes that much of the wood shows considerable erosion indicating that it “may have significant contamination of this formation from earlier formations” (e.g., alluvial deposits from an earlier times.) He further notes, “. . . that a large piece of Live Oak was found at one of the sites, which is definitely a temperate species that isn’t seen in Texas until the Oligocene (25-35 mybp).” Finally, in discussing the geology of the Wheat Ranch, (about 20 miles north of the Bordovsky Ranch toward Nixon), Singleton places the age of that ranch at 40–45 mybp, (Caddell Fm. of the lowermost Jackson Group, middle-upper Eocene). He then notes, “What immediately strikes me is the similarity between this flora assemblage and the one at the Bordovsky Ranch, whose sediments are 20 million years younger.”] So, what is the age of the petrified wood found on the Bordovsky Ranch? As Robert Morriss said, we know that it is at least 30 years old!

Arriving at the ranch, we found the plowed field immediately to our right from the ranch road we drove in on. The road followed the ridge line to the plowed field so we literally parked our cars, stepped out, and began collecting. There was more material than the group could ever do sufficient justice to (though we tried very hard), and petrified wood abounded everywhere. There were at least four or five different areas of dense rock outcrop within that plowed 80 acres. The group spread out and began filling our buckets and sacks. It was like a giant Easter egg hunt!

Throughout the day Paul directed us to four different sites on the ranch and each one produced a wealth of material. My favorite site was another ranch road that got rocky as it crossed a ridge. In hunting the road-rock, I found a nice solid piece of petrified palm 8" X 5" x 4" – my prize for the day. I saw a number of nice pieces of palm, including some red palm that others picked up as well across the various locations on the ranch.

Then there was the “shrink wood.” This is a polygon-pattern fractured wood found in South Texas. It is prized for the beautiful cabs it produces due to its high silica content, color combinations, and pattern. Exactly what “shrink wood” is has been the subject of some discussion as it was on this day as well. I turned again to a Scott Singleton article, “Hexagonal Fracturing in South Texas Petrified Wood,” - www.hgms.org/StartPageHTMLFiles/PaleoPetrifiedWoodArticles/Scott-HexFractSTexPetWood.pdf, for information.

In his article, Scott explains that this is not a single species of wood, but rather a process that petrified wood undergoes after it has been petrified (“secondary mineralization in the hexagonal fractures.”) In Scott’s words, “This can be observed easily by viewing a cut section of this material with a hand lens . . . the polygonal patterning sometimes intersects with cell structures. When this happens, the cell structure is cleanly split into two parts and each part is located in adjacent polygons. This cannot be the result of original growth, but instead must be the result of subsequent mineralization after the plant was fossilized . . . the previously fossilized specimen was subject to a stress that broke it up into columnar, polygonal sections . . . These fractures were then filled with a golden-colored silica material.” Scott continues, “this polygonal patterning is not restricted to *Palmoxylon* (palm) . . . It is common to *Palmoxylon* because this plant type is common in this area. However, I (Scott) have observed it in other wood types from this area. This again demonstrates that this type of patterning is a secondary mineralization feature that is unrelated to the actual fossil material.” Scott has a more recent article on the subject that I have yet to read: “Polygonal Fracturing in South Texas Petrified Wood,” by Scott Singleton; *Rocks and Minerals*, Vol. 83, No. 2 / Mar-Apr 2008, pp. 162-165.

Whatever it is and however old it is, “the shrink wood,” (or should I say PolyWood—or is it Paulie-Wood), the palm wood, the other petrified wood, the agates and other materials from the Bordovsky Ranch are certainly fun to collect and to work. The group of folks that was there seemed to all have a great time and was good company on a beautiful day. The Bordovsky’s have a beautiful piece of property and were very generous to share it with the club. All-in-all it was a great day to be doing just what we were doing where we were doing it with the folks we were doing it with. Hope you can join in on the next opportunity.

Show Talk

By Brian Wetzig, 2009 Show Chair

This year’s show dates are October 23rd-25th and our theme is “The History of Mining.” With that theme in mind we invite you to create a design for our show pin. Entries for the design will be accepted until July’s show committee meeting when we will select the design we like best. Therefore, you still have time to work on your designs. You can enter as many as you like. You can email them to me or drop your entries into the club house mail slot. As always the show committee meets every third Thursday of the month at 7:00 p.m. Come early and talk with the other early birds.

Y’all are all invited to the **Texas Topaz Day celebration** in Mason, TX. Gems of the Hill Country will have our 2nd annual open house on Thursday, **March 26th**, from 4 p.m. on. This date in 1969 was when the Texas Legislature designated topaz as the state gem. There will be refreshments and live music. Come see the newest Mason County topaz and quartz jewelry. We have beads made out of Mason County quartz as well as some of Dalan Hargrave’s Gemstarz jewelry. Gems of the Hill Country is located on the north side of the historic Mason square next door to the museum at 126 Ft. McKavitt. We will be walking across the street to the courthouse steps for a short wedding earlier in the day. See our website at www.texas-topaz.com for more information or call 325-347-0475.

~B. Diane Eames, GG

“How far you go in life depends on your being tender with the young, compassionate with the aged, sympathetic with the striving, and tolerant of the weak and strong. Because some day in life you will have been all of these.”

~George Washington Carver

ANNOUNCEMENT

The Board approved Alan Cherepon's proposal to organize a committee and scope out the details and cost/return on printing and selling a 2010 minerals, etc of Texas calendar, to sell prior to, during, and after the Gem Capers show. Al is going to announce the details at the next general meeting and will form the committee to gather information and costs/return estimates for presenting to the Board for a vote in one of the next meetings.

SCFMS News Rockhound of the Year 2008

The Austin Gem and Mineral Society is pleased to nominate **Brian Wetzig** for Rockhound of the Year 2008. Brian likes to slab and cab and sphere. He has served on the board of directors, and also as Second VP which involves arranging programs for the club. He also is a tireless volunteer and has participated as assistant show chairman and has been taking the lead in running the annual swap meet and the AGMS auction for the last several years.

~SCFMS Newsletter 01-02/09

AFMS News

Again this year, the American Federation of Mineralogical Society is sponsoring a raffle, to benefit the Endowment Fund. This raffle consists of donated items from different individuals and gem clubs that work with the AFMS. This fund raised over \$8,000 last year and again this year. For 2009 this raffle will take place at the AFMS meeting and show held in Billings, Montana. As I understand it now, each one of the Federations in the AFMS will be entitled for one item, for sure, as the ticket stubs that are turned in from each Federation will be put in a box and one ticket drawn. Then the items will be numbered and one number will be drawn and that item will go that Federation winner.

After the seven Federations have been drawn, all the ticket stubs will be put in a box and tickets drawn and then they will draw for an item number and that winner will receive the item numbered. This is a much better way of distributing the items to the winners. Each Federation will receive at least one winner. I have taken on the chore of getting items, donated to the AFMS Endowment raffle and selling tickets for the drawing. The tickets will sell for \$5 each or 5 tickets for \$20. This is the same as in the past years. The donated items should be in the range of at least \$50 and on up to whatever. I have heard of two items, donated and one is valued at \$200 and the other one at \$150.

If you or your club would like to make a donation, let me know and I will accept it for the AFMS Endowment Fund. I will see that it gets to Billings, Montana. If you would like to have some tickets to sell or if you would like to buy some tickets let me know and I will make them available. I will send you a ticket or send you some tickets, to be sold.

Please contact me at: bill@rockfoodtable.com or snail mail 610 Wright Street, Robstown, Texas, 78380-3815. Thanks and hope to see you at a Gem Show this year.
